EMERGING METHODS FOR EARLY DETECTION OF FOREST FIRES

MODEL BUILDING

SAVE THE MODEL

Date	09 November 2022
Team ID	PNT2022TMID13306
Project Name	Emerging Methods for Early Detection of Forest Fires

Importing The ImageDataGenerator Library

import keras from keras.preprocessing.image import ImageDataGenerator

Define the parameters/arguments for ImageDataGenerator class

```
train_datagen=ImageDataGenerator(rescale=1./255,shear_range=0.2,rot ati on_range=180,zoom_range=0.2, horizontal_flip=True) test datagen=ImageDataGenerator(rescale=1./255)
```

Applying ImageDataGenerator functionality to trainset

```
x_train=train_datagen.flow_from_directory(r'/content/drive/MyDriv e/Dataset/train_set',target_size=(128,128),batch_size=32, class_mode='binary')
```

Found 436 images belonging to 2 classes.

Applying ImageDataGenerator functionality to testset

```
x_test=test_datagen.flow_from_directory(r'/content/drive/MyDrive / Dataset/test_set',target_size=(128,128),batch_size=32, class_mode='binary')
```

Found 121 images belonging to 2 classes.

Import model building libraries

#To define Linear initialisation import Sequential from keras.models import Sequential

#To add layers import Dense from keras.layers import Dense

#To create Convolution kernel import Convolution2D from keras.layers import Convolution2D

#import Maxpooling layer from keras.layers import MaxPooling2D

#import flatten layer

from keras.layers import Flatten import warnings warnings.filterwarnings('ignore')

```
Initializing the model
```

```
model=Sequential()
```

```
Add CNN Layer
```

```
model.add(Convolution2D(32, (3,3),input_shape=(128,128,3),activation='relu'))
#add maxpooling layer
model.add(MaxPooling2D(pool_size=(2,2)))
#add flatten layer
model.add(Flatten())
```

Add Hidden Layer

```
#add hidden layer
model.add(Dense(150,activation='relu'))
#add output layer
model.add(Dense(1,activation='sigmoid'))
```

Configure the learning process

```
model.compile(loss='binary_crossentropy',optimizer="adam",metrics=[
"ac curacy"])
```

Train the model

```
val accuracy:
0.8512
Epoch 2/10
